### Anthropology & Medicine

Now Indexed in MEDLINE/PubMed

**Founding Editor: Sushrut Jadhav, University College London, UK**

Volume 19, 3 issues per year  
Print ISSN: 1364-8470 Online ISSN: 1469-2910

*Anthropology & Medicine* is an interdisciplinary journal which expands upon the growing theory and research linking anthropology with medicine. It publishes original papers and reviews within the broad framework of medical anthropology, for a world-wide readership. Whilst biomedicine continues to grow in its technological sophistication and a proliferation of disease categories, anthropology has extended its boundaries to embrace newer frameworks. The globalisation and politics of biomedicine, narrative approaches to illness, new reproductive technologies, indigenous African and Asian medicines, local critiques of professional healing systems, modern and post-modern identities of individual states and their impact on sickness, together with developments that link ethnology and population genetics to medicine are examples of topics addressed by the journal.

## Health, Risk & Society

Listed in the Thomson Reuters Social Sciences Citation Index®

Editor: Andy Alaszewski, University of Kent at Canterbury, UK

Volume 14, 8 issues per year  
Print ISSN: 1369-8575 Online ISSN: 1469-8331

*Health, Risk & Society* is an international scholarly journal devoted to a theoretical and empirical understanding of the social processes which influence the ways in which health risks are taken, communicated, assessed and managed.

Public awareness of risk is associated with the development of high profile media debates about specific risks. Although risk issues arise in a variety of areas, such as technological usage and the environment, they are particularly evident in health. Not only is health a major issue of personal and collective concern, but failure to effectively assess and manage risk is likely to result in health problems.

## Sex Education

Sexuality, Society and Learning

**Editor: Michael Reiss, Institute of Education University of London, UK**

Volume 12, 5 issues per year  
Print ISSN: 1468-1811 Online ISSN: 1472-0825

*Sex Education* is an international refereed journal concerned both with the practice of sex education and with the thinking that underpins it.

Sex Education does not assume that sex education takes place only in educational institutions and the family. Contributions are therefore welcomed which, for example, analyse the impacts of media and other vehicles of culture on sexual behaviour and attitudes. Medical and epidemiological papers (e.g. of trends in the incidences of sexually transmitted infections) will not be accepted unless their educational implications are discussed adequately.

# KEY PUBLIC HEALTH AND SOCIAL CARE BOOKS FROM ROUTLEDGE

## Key Themes in Health and Social Care

A Companion to Learning

Edited by Adam Barnard

*Key Themes in Health and Social Care* is a learning resource for students in health and social care. It provides an overview of foundational issues and core themes in the field and introduces key areas of debate, moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts:

- The first part sets the scene, addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice, and working with people.
- The second part considers key themes such as the contribution of philosophy and politics; criminal justice; management of services; the relationship between place and wellbeing; research in health and social care; theories of counselling; housing and the built environment.

- The third part looks at discrete areas of practice such as mental health; substance abuse, protection work; health promotion; disability studies; working with men; child welfare and public responsibility.

Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning and consolidate their understanding. Time-pressed readers wanting to 'dip into' the book for relevant areas can do so but, read from cover to cover, the book provides a comprehensive introduction to the key areas of contemporary health and social care practice.

## Managing in Health and Social Care

2nd Edition

By Vivien Martin, Julie Charlesworth and Euan Henderson

*Managing in Health and Social Care* is about developing skills to manage and improve health and social care services. The focus throughout is on the role that a manager can play in ensuring effective delivery of high-quality services. Examples from social care and health settings are used to illustrate techniques for managing people, resources, information, projects and change.

This new edition has been extensively revised and updated, and includes many new case studies and examples, as well as a new chapter on motivation. It covers topics such as interorganisational and interprofessional working; leadership; responding to the needs of service users; the service environment; accountability and risk; working with a budget; standards and quality; and managing change.

*Managing in Health and Social Care* is a practical textbook for students of management in health and social care, whether at undergraduate or postgraduate level. It includes case studies with textual commentary to reinforce learning, activities, key references and clear explanations of essential management tools and concepts.

The first edition of this book was published in association with The Open University for the Managing Education Scheme by Open Learning (MESOL).

## Routledge Handbook of Global Public Health

Edited by Richard Parker and Marni Sommer

At the beginning of the twenty-first century, key public health issues and challenges have taken centre stage. They range from arsenic in drinking water to asthma among children and adults; from the re-emergence of cholera, to increasing cancer rates and other chronic diseases; from AIDS to malaria and hepatitis; from the crises faced by displaced or refugee populations to the new challenges that have emerged for reproductive health and rights.

Like most aspects of contemporary life, these problems have been impacted by globalization. The *Routledge Handbook of Global Public Health* explores this context and addresses both the

emerging issues and conceptualizations of the notion of global health, along with expanding upon and highlighting the critical priorities in this rapidly evolving field. It will be organized in ten main sections. The topics covered include the transition from international to global health; structural inequalities and global public health; ecological transformation and environmental health in the global system; population and reproductive health; conflict, violence and emergencies in global public health; global public health policy and practice; global public health and development; global mental health; global access to essential medicines; and health systems, health capacity, and the politics of global public health.

## Cognitive-Behavioural Therapy

Research and Practice in Health and Social Care

2nd Edition

By Brian Sheldon

Cognitive-behavioural therapy (CBT) has been extensively researched and shown to be solidly underpinned by evidence. Broadly applicable across a wide range of personal and social problems – from depression and phobias to child care problems – it is only now beginning to be used to its full potential in health and social care practice.

This second edition of *Cognitive-Behavioural Therapy* is comprehensively revised and updated. It takes into account the significant amount of new research in the discipline and integrates theory, research and practice. The text includes plentiful case studies from across health and social care to illustrate particular approaches, different problems and different professional circumstances. Topics

covered include a discussion of the development and distinctive features of CBT; a comprehensive review of research on learning and cognition, examining the therapeutic implications of these studies; a thorough guide to assessment and therapeutic procedures, including methods of evaluation; illustrations of the main methods of helping with case examples from social work, nursing and psychotherapy; and consideration of the ethical implications of such methods as part of mainstream practice.

## Practice-based Evidence for Healthcare

Clinical Mindlines

By John Gabbay and Andrée le May

This book challenges the evidence-based practice movement to re-think its assumptions. Firmly rooted in real practice while drawing lucidly on a great breadth of theoretical frameworks, it examines afresh how clinicians use knowledge.

Evidence-based practice has recently become a key part of the training of all health professionals. Yet despite its 'gold-standard' status, it is faltering because too much effort has gone into insisting on an idealised model of how clinicians ought to use the best evidence, while not enough has been done to understand why they so often don't.

*Practice-based Evidence for Healthcare* is a groundbreaking attempt to redress that imbalance. Examining how clinicians actually develop and use clinical knowledge day-to-day, the authors conclude that they use 'mindlines' – internalised, collectively reinforced, tacit guidelines. To explore

how mindlines work Gabbay and le May draw on a wide range of disciplines to analyse their detailed observations of clinical practice in the UK and the US. Their conclusions and provocative recommendations will be of value to all practitioners, health service managers, policymakers, researchers, educators and students involved in the promotion of evidence-based practice.
