

Mycology:

An International Journal on Fungal Biology

Official Journal of the *Mycological Society of China*

INVITATION TO SUBMIT

This new journal aims to provide a platform to meet the needs of a demanding and growing field, and to serve and engage dialogue between Chinese mycologists and the international community.

The Editors in Chief warmly welcome your submissions. ***Mycology*** will publish papers on all aspects of mycology including lichens, with preference to systematics, ecology and biodiversity, genomics and proteomics, and molecular phylogeny and evolution. Other appropriate subjects for the journal include bioinformatics, physiology and biochemistry, pathology, morphology development, cell biology, genetics, molecular biology, fungal enzymology, fungal metabolites and new techniques.

The following types of papers will be considered:

- a) Original Research Articles
- b) Technical Reviews or Notes reporting new research
- c) Invited papers

Mycology:

An International Journal on Fungal Biology

Official Journal of the *Mycological Society of China*

Volume 1, 2010, 4 issues per year

Institutional Rate (print and online access): £212/US\$350/Euro280

Institutional Rate (online only): £202/US\$333/Euro266

Individual members of the *Mycological Society of China* are eligible to receive the journal as part of their membership. Individuals should contact the Society for further details.
